

ÖKOINDUSTRIA 2013

3rd International Environmental Industry, Energy Efficiency and
Renewable Energy Exhibition
25-27 September 2013

SYMA Event Centre, Budapest, Hungary
www.okoindustria.hu

ÖKOINDUSTRIA Exhibition is the largest green industry exhibition in Hungary that provides introduction of environmental industry for professional partners and public visitors biannually. The aim of the exhibition is to present the results and innovative solutions of environmental industry and to show the way towards a green economy. Concerning the current economic trends and opportunities this event concentrates on partners and business opportunities outside the European Union (South-East Europe, Commonwealth of Independent States, South-East Asia) in respect of both exhibitors and visitors and it aims to establish and strengthen such relations.

Main Patron:

Péter Szijjártó, State Secretary for Foreign Affairs and External Economic Relations of State Office of the Prime Minister of Hungary

Profile of ÖKOINDUSTRIA Exhibition:

waste, products from secondary raw materials and wastes, prevention, air, water, soil, renewable energy, energy efficiency, ecobuilding, climate protection, biotechnology, noise and vibration control

Main topics:

- The 3rd ÖKOINDUSTRIA focuses on **air quality** in the European year of air protection, opportunities for reducing air pollution and the implementation of Industrial Emissions Directive. We expect more financial tools to cope with air pollution in the following period of EU budget after 2014.
- There is a significant interest for recycling industrial waste on the Hungarian market. On the exhibition there will be emphasis on the **end-of-waste** processes, **secondary raw materials** and their possible applications.
- The tasks from the European Water Framework Directive will be in the focus of the **water** section of ÖKOINDUSTRIA.
- Energy performance certification of buildings
- Social responsibility of environmental enterprises

Target groups of 3rd ÖKOINDUSTRIA:

Exhibitors:

- representatives of the environmental industry
- enterprises presenting their environmental innovatives
- environmental research and innovation organisations
- environmental professional associations
- foreign environmental enterprises
- economic and trade offices of foreign embassies

Visitors:

- producer and servicing branches, the partners of the environmental industry
- professional organisations
- environmental authorities
- stakeholders in the state administration, municipalities
- stakeholders of environmental performance
- stakeholders of the process realising green economy
- lecturers and students of environmental sciences

Side events:

There will be high quality professional side events parallel to the Exhibition:

Planned programs and events:

- International B2B and Conference – Enterprise Europe Network
- Polish National Day
- International Café for Business Partners' Meeting
- V4 Environmental Export Platform
- ÖKOINDUSTRIA Award Ceremony (award application open for exhibitors)
- Networking reception
- 'The Role of Pyrolysis in Waste Management' Conference
- Conference on 'Importance of Reuse in Waste Management'

The 1st and 2nd ÖKOINDUSTRIA International Exhibition welcomed about 5000-6000 visitors, conferences and side events attracted 1000 participants.

Why does it worth participating at ÖKOINDUSTRIA?

- You can represent the products of your companies and find their users.
- You can get an overview about the environmental market of Hungary and other participating countries, learn the latest innovation results.
- You can find your future business partners for joint projects.
